

## Challenge 6: Summarize data using Azure Databricks

Duration: 10 minutes

In this exercise, you will prepare a summary of flight delay data using Spark SQL.

### Task 1: Summarize delays by airport

1. Open your Azure Databricks workspace **(1)**, expand the **Exercise 6 (2)** folder, and open the final notebook called **01 Explore Data (03)**.

2. Execute each cell and follow the instructions in the notebook that explains each step.
